
KEEP WITH YOUR GUARD PROPOSAL

Protection for the product. A clear place to turn for help.

Clean Pro Guard comes with three distinct protections. Here is what each is for.

Lifetime material coverage

Coverage for the guard material, separate from installation workmanship and routine surface maintenance.

Lifetime covered no-clog service

If the gutter beneath a properly installed, reasonably maintained Clean Pro Guard system develops a covered clog, we remedy or clean that clog at no charge.

One year of installation workmanship coverage

The installing independent contractor is responsible for covered workmanship corrections. Clean Pro coordinates the service request.

Protection that follows the home

Residential: lifetime material and covered no-clog protection transfer with the home. **Commercial:** coverage follows the commercial installation. Keep your proposal and installation records with the applicable terms.

A little surface care is still part of ownership

Leaves and debris can collect on top of any guard. Arrange periodic removal of accumulated surface debris. Routine top-side maintenance is different from a covered clog in the gutter beneath the guard. Do not climb onto a roof to investigate a concern.

Start with Clean Pro

Call (877) 736-0586 or email sales@cleanproguttercleaning.com. Tell us the installation address and what you noticed. Share ground-level photos if safe. We can help you identify the next step.
